Sun Lighting Employee 2nd in State to Receive “Ph.D. in Lighting”

Tucson, AZ- Bob Brouillette did not take the conventional route for post graduate work. Instead, the Sun Lighting employee became only the *second* person in the State of Arizona to become a Certified Lighting Consultant, the “Ph.D. of lighting.”

Five years ago, Bob sold his lucrative chain of grocery stores in Seattle to pursue his true passion, a career in lighting. After only one year as a floor manager at a Seattle lighting company, Brouillette passed the American Lighting Association’s (ALA) Lighting Specialist test, which was the first step toward his certification. Bob then uprooted his life again and moved his family to Tucson, where he continued his lighting career with Sun Lighting.

To become a Certified Lighting Consultant, the American Lighting Association requires 35 hours of rigorous classes sanctioned by the Association and a minimum of five years of lighting experience. Although it took Brouillette six months to pass the final exam, he is now requested by contractors and interior designers throughout Tucson for his expertise. Just call Brouillette The Lighting Guy!

Sun Lighting is located at 4545 E. Broadway Blvd. in between Swan and Columbus and can be reached at (520) 322-4303.
